A STUDY FOR THE MEASUREMENT OF THE Λ BARYON ELECTROMAGNETIC DIPOLE MOMENTS IN LHCB

Relatore: Prof. Nicola NERI Correlatore: Dott. Pippo BAUDO

> Tesi di Laurea di: Alessandro DE GENNARO Matricola 933289 Codice P.A.C.S.: 14.20.-c

Anno Accademico 2020-2021

Introduction

Electric and magnetic dipole moments of particles are sensitive to physics within and beyond the Standard Model. In this thesis, sensitivity studies for the measurement of the Lambda baryon electromagnetic dipole moments based on pseudo experiments will be performed. In addition, the possibility of a first measurement using data collected with the LHCb detector will be explored [1].
